1.2 UI/UX Design

Clinical Assessment for Preceptor

Low Fidelity Prototypes

Flowchart/User Flow

High Fidelity Prototypes

Role:

My primary responsibility was to build six interactive videos for the Blended Learning research program and ideate, flowchart, and prototype web layouts. The UI/UX was designed with a dashboard-like interface.

Tools:

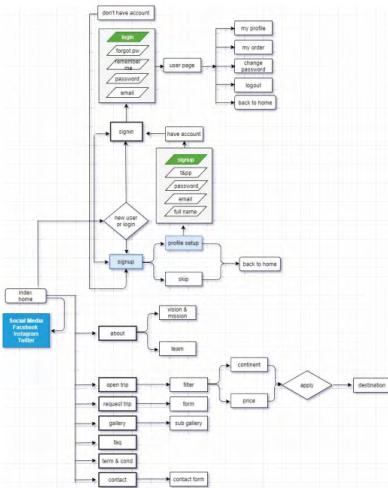

Photoshop, Illustrator. For interactive videos; Photoshop, Illustrator, Premiere, After Effect, and Camtasia.

Travel Agency Website

Low Fidelity Prototypes

Flowchart/User Flow

High Fidelity Prototypes

Role:

Logo Creation, Ideation, Flowchart, UI/UX design

About this project:

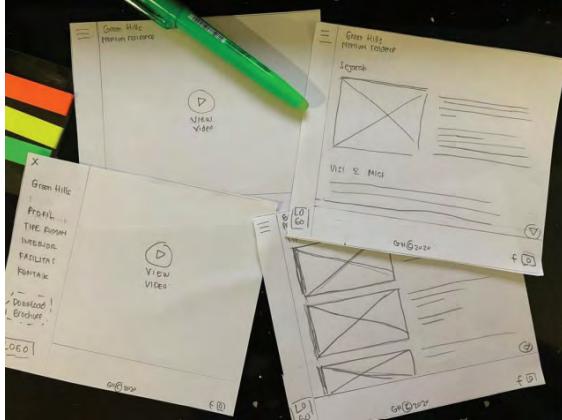

Departmen Travel was first launched in 2016, the website and business are taking a break for a while with a new brand, team, and website. Departmen Travel might sound like Department of Travel, but the DeparTEMEN TRAVEL itself has its meaning in Indonesian.

TEMEN means Friend or Buddy in informal Indonesian. So, Temen Travel means Travel Buddy.

Tools: Photoshop, Illustrator, Figma.
You can view the prototype [here](#).

Travel Agency Website

Low Fidelity Prototypes

Flowchart/User Flow

High Fidelity Prototypes

The high-fidelity prototype is a responsive website for "green hills premium residence". It features a dark header with the brand logo and a navigation menu on the left side. The main content area displays a large, scenic image of a modern residential complex with a play button overlay. At the bottom, there's a footer with address information, a copyright notice, and social media icons.

4. Video

4.1 E-Learning/Interactive Videos

Developed a 12-module of interactive video for Blended Learning, performed the entire video process which included video shooting, editing, and creating SCORM compliant modules.

- Some footage are filmed by NUS Edu Tech.
- The Interactive parts are not to disclose.
- The majority of projects are for internal uses only, National University of Singapore.

Virtual Simulation on Multidisciplinary Team Care Delivery

JOIN US!

Who can join?

Students from Year 3 & 4:

- Medicine
- Medical social work
- Nursing
- Occupational therapy
- Pharmacy
- Physiotherapy

Multidisciplinary Team Care Delivery

- Engage in multidisciplinary bedside round and discharge care planning
- Introduce to shared mental models
- Facilitate effective communication and collaboration in multidisciplinary team care planning for patient-centered care

Learning Objectives

- Understand the roles & responsibilities of different healthcare professionals in the delivery of team care
- Apply shared mental model using SBAR to support care planning in multidisciplinary bedside rounds
- Apply shared mental model using biopsychosocial model to support multidisciplinary discharge care planning

2-hour interprofessional learning between Jan to June 2021

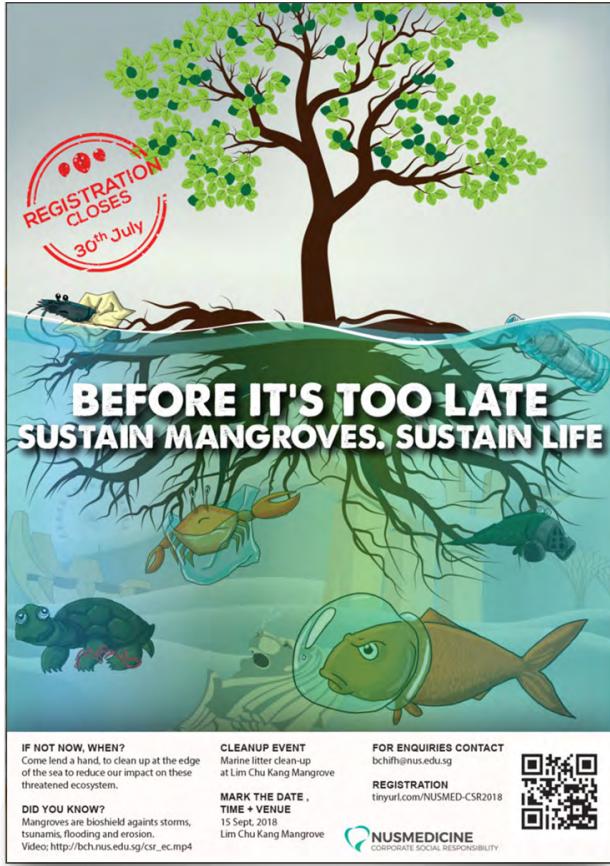

If interested, please contact **Maybelline** at nurslo@nus.edu.sg before 31 Dec 2020
